CAREER OBJECTIVE

Third-year Computer Science Engineering student with hands-on experience building full-stack web applications (Node.js, Express, MongoDB) and modern frontend interfaces. Comfortable taking a project from database design through deployment, with practical exposure to REST APIs, authentication, email/PDF workflows, and IoT prototyping. Seeking an internship/entry-level opportunity to apply strong fundamentals in Data Structures, Networking & Security, and full-stack development to real-world engineering problems.

EDUCATION

D. Y. Patil Prasad Global University | *B.Tech, Computer Science & Engineering* 2025 – 2028 (Expected)

3rd Year | CGPA: 9.36 / 10

Jaihind Polytechnic, Kuran | *Diploma in Engineering*

Final Year Aggregate: 85.66%

Hira English Medium School | *SSC (10th Grade)*

Percentage: 91.20%

EXPERIENCE

Full Stack Web Developer Intern | *Omegasoft Technologies Pvt. Ltd.*

45 Days

- Worked on live web development projects using HTML, CSS, JavaScript, and MongoDB across the internship period.
- Built and styled responsive web page layouts and integrated MongoDB for data storage and retrieval.

Frontend Development Intern | *Cosmo People Foundation (NGO), Maharashtra*

- Modernized the organization's website across 16 HTML/CSS pages, executing a full brand color migration and removing legacy UI elements.
- Redesigned the contact form into a structured NGO registration form and fixed navigation visibility issues on the donations page.
- Applied on-page SEO best practices — meta tags, Open Graph tags, and canonical URLs — to improve site discoverability.

Full-Stack Developer (Freelance) | *Prime Computers, Junnar, Pune*

- Designed and built a complete business website with a dark cyberpunk aesthetic (glassmorphism UI, neon accents, custom typography).
- Developed a Node.js/Express/MongoDB backend from scratch, including a Print Services module with PDF upload handling and Nodemailer email delivery with attachments.
- Implemented an admin dashboard and order-tracking system, along with rate limiting, Helmet security headers, and authentication middleware for admin routes.

PROJECTS

Personal Portfolio Website | *Personal Project*

- Designed and developed a personal portfolio website to showcase skills, projects, and experience with a clean, responsive layout.

NOIR — Luxury E-commerce Website | *Personal Project*

- Built a single-file, dark-themed fashion e-commerce storefront (HTML/CSS/JS) featuring a cart sidebar, product filtering, countdown timers, and a glassmorphism navbar with INR pricing.

PlaceMe — College Internship & Placement Portal | *Academic Group Project*

- Developed a full-stack placement portal with role-based dashboards for Students, Companies, and TPO Admins, supporting job applications, resume uploads, and analytics.

IoT Weather Station | *Personal Project (In Progress)*

- Prototyping a compact weather monitoring station using ESP8266/ESP32 with DHT11/DHT22 sensors for temperature and humidity tracking.

PUBLICATIONS

Health Management System for Gym-Goers through ML | *International Research Journal of Modernization in Engineering Technology and Science (IRJMETS)* April 2025

- Co-authored a peer-reviewed research paper published in IRJMETS (Volume 07, Issue 04), e-ISSN: 2582-5208, proposing a machine learning-based health management system for gym-goers.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Web Development: HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB, EmailJS

CS Fundamentals: Data Structures & Algorithms, Theory of Computation, DBMS

Networking & Security: Network Security Fundamentals (X.800), Firewall Configuration (iptables), M2M/IoT Device Architecture

IoT & Electronics: ESP8266/ESP32, DHT11/DHT22, Arduino, Sensor Interfacing

Tools & Platforms: Git, GitHub, VS Code, Postman, MongoDB Compass
